Experience

● **[academic] Full Stack / Front-End Developer - MangaCoffee**
   July 2022 - August 2022   Argentina

   ○ Develop a full stack web application using the MERN stack.
   ○ Lead, plan, and organize on a large scale all the functionalities and tasks to be done to carry out the development of the application.
   ○ Implement new technologies we had no knowledge of such as TypeScript, redux-toolkit, socket.io, among others.

● **[academic] Full Stack Developer - Wikidogs**
   June 2022   Argentina

   ○ Develop a SPA using the PERN stack.
   ○ Implemented a REST API (The Dog API, using only one endpoint)
   ○ Apply all the knowledge acquired during the SoyHenry Bootcamp
   ○ Organize and plan the design, functionalities, code structure of both the Front-end and Back-end.
